

#### PROGRAMME COORDINATION

National University of Ireland, Galway

**Prof Afshin Samali**

Programme Coordinator

**Dr Sandra Healy**

Programme Manager

[trainers@nuigalway.ie](mailto:trainers@nuigalway.ie)

TRAINERS is funded by the EU's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant 675448

## Who We Are

The network is composed of 10 beneficiary partners that will supervise the young researchers and are located in Ireland, France, UK, Belgium, Sweden, Spain, Germany and Austria. TRAIN-ERS also has 6 partner organisations that will provide training and the opportunity for clinical and industrial secondments.

## ENDOPLASMIC RETICULUM STRESS IN HEALTH AND DISEASE

Endoplasmic Reticulum (ER) stress is a common feature of diseases such as cancer, neurodegeneration, obesity and inflammation.

Our lack of knowledge and a shortage of scientists with expertise in this area is hindering efforts to exploit the ER stress response for therapeutic purposes.

Increasing understanding of the ER stress response and training young scientists in this area will provide us with new ways to tackle ER stress-associated diseases.

**Excellent multidisciplinary research.....**

### TRAINERS MISSION

Drive understanding of ER stress in order to develop new strategies and treatments for diseases including cancer, neurodegeneration and inflammatory conditions.

To do this TRAINERS will bring together

- 14 young researchers
- world-leading academics
- clinicians
- industry personnel

to carry out an innovative training programme and cutting edge research.

**Innovative training programme to empower young researchers.....**
